

## **SPAMINA TO GIVE FIRST UK DEMO OF CLOUD EMAIL SECURITY PLATFORM AT INFOSECURITY EUROPE 2011**

*Low-cost, enterprise-class email security solution on display at stand K74*

**Reading, 12 April 2011** - [Spamina](#) is showcasing its unified, enterprise email security platform at [Infosecurity Europe](#), (19<sup>th</sup>-21st April, Earls Court, London). Spamina is also attending the show to outline its extensive growth plans in Europe, and will be joined by its new UK datacentre partner, [In-Tuition Networks](#).

Spamina is offering an alternative to high-cost, individually-sold email security products with its unified email security platform, sold on a cost per year per mailbox model and hosted via private, public or hybrid cloud models. It recently added its Cloud Email Archiving solution to its existing Email Firewall capabilities, giving businesses and service providers a holistic email security platform from a single management console.

With email security becoming an increasing concern to all businesses, Spamina is looking to drive extensive growth in Europe, where it aims to generate 10 per cent of its turnover by the end of 2011. Already this year, the company has established a network of offices, data centres and distributors in Italy, France and UK.

Spamina's UK datacentre partner, In-Tuition, owns and operates a highly available, enterprise grade cloud hosting platform based in London. This offers UK customers a local point of access for all emails, and allows companies to comply with any legal obligation to house their email in the UK. It also removes any user concerns about where their information is stored.

### **Key attendees include:**

- Ramón Plannas, VP Sales and Marketing, Spamina
- Jim Tyer, International Sales Director, Spamina
- Dan Power, UK Country Manager, Spamina
- Marc Gadsdon, Managing Director, In-Tuition Networks

**Quotes:**

Ramón Plannas, VP sales and marketing at Spamina, said: "Our unified, enterprise email security suite will be the first of its kind in the industry, and we are pleased to be announcing its availability at Infosecurity Europe. With data privacy still proving a major concern for businesses, we look forward to demonstrating that an all-inclusive, robust email security platform is within the reaches of even the slimmest of budgets and IT resources."
