

## **SPAMINA CONSOLIDATES ITS TOTAL PERIMETER SECURITY SUITE “CLOUD EMAIL SECURITY” ON THE MARKET**

### ***ONE HUNDRED NEW COMPANIES JOIN ITS DISTRIBUTION CHANNEL***

SPAMINA, a company that develops innovative email security solutions, launched its new integrated security concept early this year which it has included in a complete security suite called "Cloud Email Security". The purpose of this new suite is to provide users with a global and integrated security service with flexible solutions that adapt to any company's security needs. "Cloud Email Security" comprises the three Spamina solutions available for Private Cloud and Hybrid Cloud environments: Cloud Email Firewall which effectively protects, administrates, controls and manages companies' email accounts; Spamina Email Archiving, a secure email archiving and administration solution developed to facilitate storage and immediate access to email so as to comply with corporate and legal standards and Spamina Email Encryption & DLP to encrypt messages and prevent data leaks (DLP).

With respect to the ever more common implementation of the company's solutions at businesses that operate in clouds, Ramón Planas, Vice-President of Sales and Marketing at Spamina, said, "Nowadays, proper information management is key to increasing a company's profitability and productivity. Our suite offers total perimeter security for all types of organisations and in any type of environment with the benefits this involves for managing, storing and preserving email and data, factors which are ever more critical for these companies."

On the other hand, Ramón Planas showed his satisfaction with the fact that by the end of the first semester of 2011, Spamina will have certified nearly 100 new companies as part of its specialised channel which will consolidate and reinforce its ever more important role as the leading supplier in the security sector. During this period,

Spamina has organised Certification Days in Spain, Great Britain, Italy, France, Mexico and Brazil, countries where the new distributors have been able to gain in-depth knowledge of the security tools included in the Spamina Cloud Email Security Suite.

### **About Spamina**

Spamina is a company that develops and delivers innovative E-mail security solutions in Public Cloud, Hybrid and Private Cloud environments. Spamina's solutions are designed for all types of businesses and MSP's/ISP's with solutions for Email Firewall, Archiving, Encryption and DLP (Data Lost Prevention) aimed at ensuring that system administrators and users have secure protection, management, and total control of their email.
